COSRO is looking for Partners in  
Social Volunteering ( Yoga and Nature Cure )  
Project on Nature Cure Research and Training  
Under Global Peace and Harmony Mission

There is need to arrest wide use of medicines, vitamins and supplements, factory made packed foods, which are a source of toxins that cause diseases and need to align with nature thru wide use of natural fresh air, sun light and simple nature therapy using water and earth as curing agents. Wide use of nature cure will be a boon for poor public as they have to shed out a major portion of their income on medicines. **Return to Nature thru Nature Cure, Nature Care , Adopting Yoga and Meditation, exploring self-consciousness, and working for community in place of performing religious rituals,** are some ways for Sustainable Growth.
